

CSS Box model

CSS Box Model is a Fundamental concept in CSS that governs how elements are structured and positioned on a webpage. By learning this model, you'll create elements visually appealing that adjust seamlessly to various screen sizes. It is used to create the design and layout of web pages.

What is the CSS Box Model?

The box model in CSS is a container that contains various properties, including borders, margins, padding, and the content itself. These properties collectively determine the dimensions and spacing of an element.

Let's break down the key components:

- **Content:** The actual data in text, images, or other media forms can be sized using the width and height property.
- **Padding:** is used to create space around the element, inside any defined border.
- **Border:** is used to cover the content & any padding, & also allows setting the style, color, and width of the border.
- **Margin:** is used to create space around the element ie., around the border area.

1. Content Area

- Contains the actual data, such as text, images, or other media.
- Sized using the width and height properties.
- Bounded by the content edge.

2. Padding Area

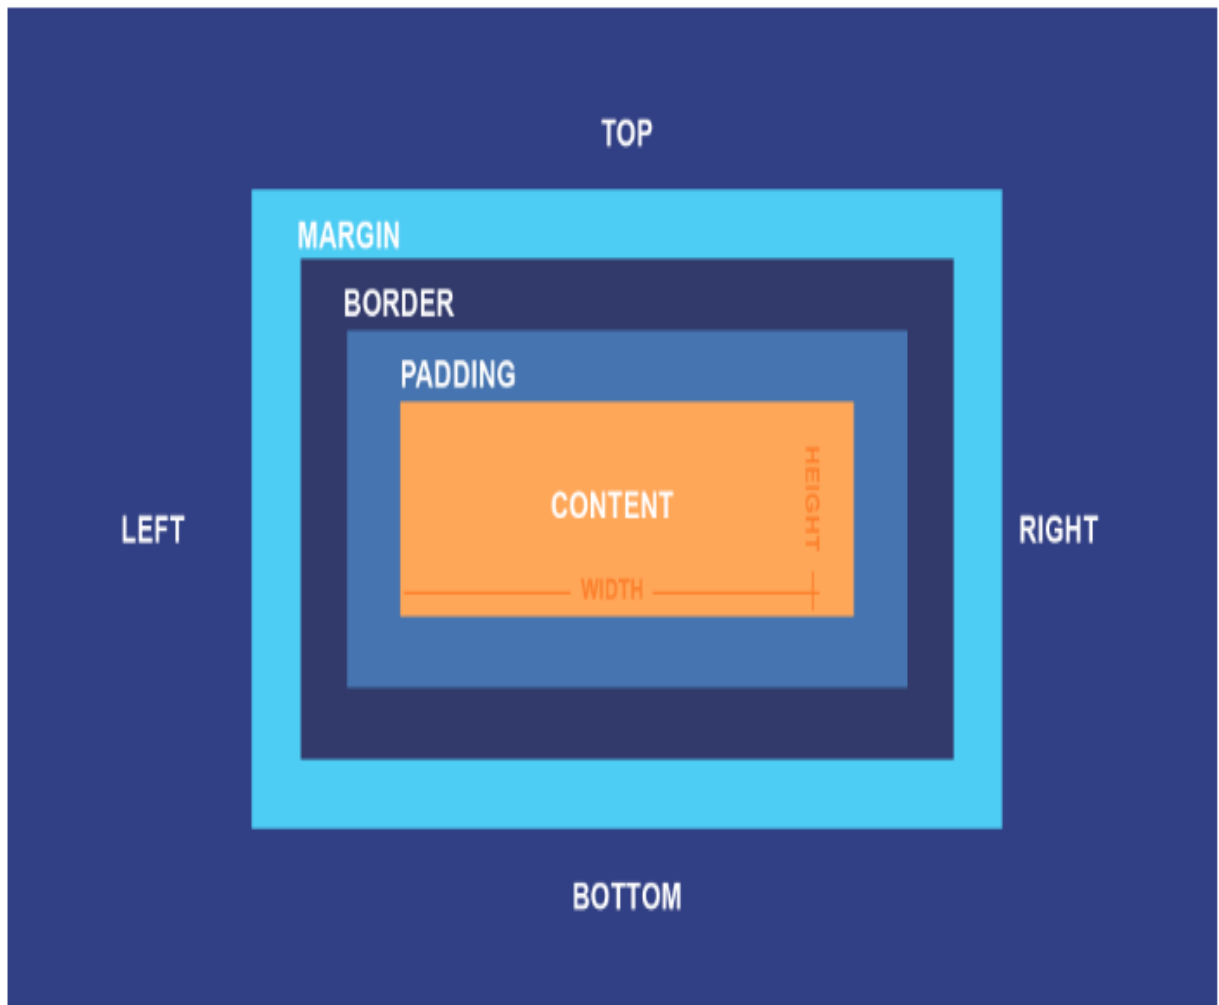

- Surrounds the content area.
- Space within the border box.
- Dimensions are determined by the width and height of the padding box.

3. Border Area

- Lies between the padding and margin.
- Width and height are defined by the border.

4. Margin Area

- Separates the element from adjacent elements.
- Dimensions specified by the margin-box width and height.

Example:

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
  </head>
  <title>Box Model</title>
  <style>
    /* .div1 {
      border: 2px solid red;
```

```
background-color: aqua;
color: darkblue;
margin: 30px;
padding: 80px;
} */
/* .div1 {
border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding-top: 80px;
} */
/* .div1 {
border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding-bottom: 80px;
} */
/* .div1 {
border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding-right: 80px;
} */
/* .div1 {
border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding-left: 80px;
} */
/* .div1 {
border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding-top: 80px;
padding-right: 20px;
padding-bottom: 30px;
padding-left: 40px;
} */
/* .div1 {
```

```

border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding: 30px 60px 120px 240px; */
/* padding top right bottom left */
/* } */
/* .div1 {
border: 2px solid red;
background-color: aqua;
color: darkblue;
margin: 30px;
padding: 80px 100px;
/* padding top & bottom (80) And left right (100) */
/* } */
/* */
.div1 {
border: 10px solid red;
background-color: gray;
color: darkblue;
margin: 30px;
padding: 80px;
width: 200px;
border-radius: 85px;
float: left;
}
div > h1 {
color: yellow;
text-align: center;
}
div > p {
color: black;
font-size: 20px;
}
</style>
</head>

<body>
<div class="div1">
<h1>Registration Form</h1>

<form action="">
First Name:<input
type="text"

```

```
        name=""
        id=""
        placeholder="Enter first name"
    />
